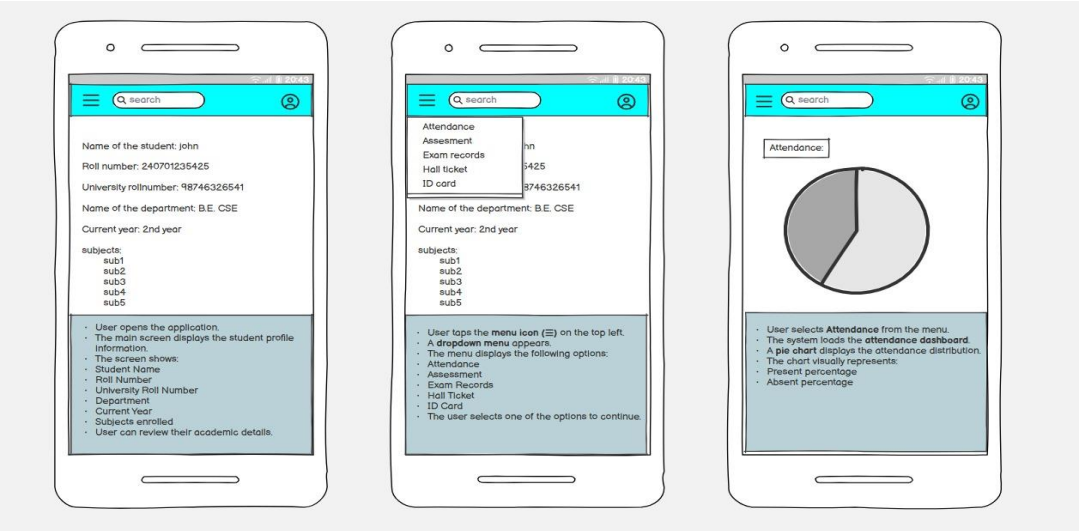
Student Profile & Academic Management System

Wireframe:



Description:

The storyboard shows a student viewing profile details, accessing the menu, and checking attendance through a visual dashboard in a simple mobile app flow.

1 . Storyboard Overview

- The storyboard represents the **mobile application user flow** consisting of three main screens:

- Student Profile Screen
- Navigation Menu Screen
- Attendance Dashboard Screen
- These screens demonstrate how a user interacts with the system to access academic details.

2 . Module Description

- **Student Profile Screen**
- Displays basic student information:
    - Student Name
    - Roll Number
    - University Roll Number
    - Department
    - Current Year
    - Subjects Enrolled
- This is the **home screen** after login.
- Allows students to quickly review their academic details.

3. Navigation Menu Screen

- Activated by tapping the **menu icon** .
- Displays a dropdown list of features:
    - Attendance
    - Assessment
    - Exam Records
    - Hall Ticket
    - ID Card
- Helps users navigate to different modules of the application.

4 . Attendance Dashboard Screen

- Displays attendance information using a **pie chart**.
- Shows:
    - Present Percentage
    - Absent Percentage
- Provides a **visual representation** for easy understanding of attendance status.

5 . User Flow

- User opens the application
- Student profile details are displayed
- User taps the menu icon
- Menu options appear
- User selects “Attendance”
- Attendance dashboard is displayed with a chart
